French Doors

French Doors are ideal for use in extensions or conversions, especially when combined with a conservatory. French Doors provide instant access between the home and garden, and offer outstanding levels of light and aesthetic appeal.

For greater versatility, French Doors can open inwards or outwards. Restrictors are fitted as standard to all open out doors to ensure enhanced safety.

Security is of utmost importance that is why all French Doors feature an 8-point locking system (centre latch, deadbolt, 4 roller cams, and a top and bottom shootbolt).

French Doors are available in the Inliten 70mm system, with a sculptured finish and range of colour options.

Features & Benefits...

Finish: Fully sculptured frame finish

Colours: Available in white, oak, rosewood, mahogany, black and cream (other colours may be available upon request)

Glass: A range of thermally and energy efficient glazed units are available. *Toughened options for extra safety*

Security: 8-point locking system fitted as standard and internally glazed for extra security

Furniture/Hardware: Available in a choice of white, black, gold, dull silver and shiny silver

Low Maintenance: Moving parts within the door require a light oiling once or twice a year to ensure a smooth opening. Frames and glass should be washed using luke-warm water and washing-up liquid
